

AXE20F-X, AXE20F-Y and AXE20F-XY

The **AXE20F-X**, **AXE20F-Y** and **AXE20F-XY** mobile lasers are precision alignment solutions for medical and industrial applications. The units create one or two manually adjustable laser planes by projecting high-quality red, green or blue laser lines. When combined with other similar units, this allows the creation of a 3D reference in the Cartesian space.

The **AXE20F-XY** crosshair model features two independently adjustable orthogonal laser planes.

Features

- High-accuracy positioning
- Single-plane or crosshair
- 3 degrees of freedom per plane: translation, tilt and rotation
- Red, green or blue high-quality laser line module for each plane
- Easy by-screw adjustment from the outside
- Flexible on-wall, in ceiling or on post mounting
- Usable with MRI/MR-Linac machines
- MR conditional

Applications

- Patient setup and marking in the field of radiation therapy
- Alignment and calibration of machinery and industrial equipment
- Leveling and alignment for manufacturing processes
- Metrology and geometric measurements

Technical specifications

Power supply	100–240 V _{AC} @ 50/60 Hz
Power consumption	49 W max.
Internal voltage	12 V _{DC}
Operating humidity	≤ 80%, non-condensing
Operating temperature	15–30 °C
Dimensions (H×W×D)	205×220×97 mm
Weight (AXE20F-X, AXE20F-Y)	3.9 kg
Weight (AXE20F-XY)	4 kg

Laser output*

Laser class	2
Output power**	< 1 mW
Focus range	1.5–7 m
Line width	≤ 1 mm @ 4 m
Line length	≥ 4 m @ 4 m

* with laser modules **WLCxxx-5-LGCP**, not included (see separate datasheet)

** measured on a 7 mm aperture at 100 mm

Mechanical

Adjustment accuracy	±0.1 mm @ 3 m
Translation range	0–18 mm
Translation resolution	0.5 mm/turn
Tilt range	±3.6 deg
Tilt resolution	30 µm/m
Rotation range	±3.5 deg
Rotation resolution	50 µm/m

External connections

The **AXE20F** units embed an IEC/EN 60601-1 compliant 100–240 V_{AC} IEC inlet.
